

Tampa Bay FAASTeam presents:

Operations at Non-towered Airports with a Control Tower Closed Due to Sequestration(!)

The Albert Whitted Air Traffic Control Tower is among 17 towers in Florida scheduled for closure sometime in April and May. Pilots taking off and landing at Albert Whitted or any tower-closed airport need to be familiar with the FAA & AOPA recommended procedures that need be followed for safe operations.

Air Traffic controllers from TPA Tower & PIE Tower plus FAASafety Team Representatives will be present to discuss operations in Class B & D airspace after Whitted Tower is closed. Whitted has some unique runways and obstructions that must be considered by all pilots - fixed wing and rotorcraft.

Directions: The FWRI Auditorium is located at 1st Street & 8th Ave SE across the street from Albert Whitted Airport. Parking is available in the airport parking lots. Aircraft can taxi to Bay Air.

A message from the National FAASafety Team Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area

Sign up for the FAA's safety services at www.FAASafety.gov!

The FAA Safety Team (FAASafety Team) is committed to providing equal access to this meeting/event for all participants. If you need alternative formats or services because of a disability, please communicate your request as soon as possible with the person in the "Contact Information" area of the meeting/event notice. Note that two weeks is usually required to arrange services.
